TECHNICAL SKILLS

Programming & Core CS: Python, JavaScript, C++, SQL, MERN Stack (MongoDB, Express.js, React.js, Node.js)

Backend Development: Django, Flask, Node.js, Express.js, RESTful APIs, JWT Authentication, RBAC, API Integration

Frontend Development: React.js, HTML5, CSS3, Responsive UI Design, Component-Based Architecture

Databases: PostgreSQL, MongoDB, SQLite, MySQL

AI / ML: LLMs, RAG, OpenAI API, Prompt Engineering, Predictive Analytics, Pandas, NumPy

AI Tools: ChatGPT, n8n, Google AI Studio, Claude, Higgsfield, Kimi

Cloud, Tools & Practices: AWS Fundamentals, Hostinger VPS, Git, GitHub, Postman, VS Code, Razorpay Integration, Agile/Scrum, SDLC

PROFESSIONAL EXPERIENCE

Associate Software Intern

May 2026 – Jul 2026

Tietoevry | Chandigarh, India

- Debugged and monitored a production banking software system, identifying and resolving issues to maintain reliability.
- Built Python and Django scripts to automate recurring operational and monitoring tasks, reducing manual effort.
- Investigated production issues and traced them to root cause across the backend codebase.
- Worked with the engineering team to support day-to-day operations of live banking software.

Full Stack Developer Intern

Jul 2025 – Sep 2025

Lucres | Remote

- Built an AI-powered ATS resume builder using OpenAI APIs and a Node.js backend.
- Designed modular backend services to keep the codebase easy to maintain.
- Optimized APIs and data structures to handle concurrent users at launch.
- Worked in Agile sprints using GitHub — feature branches, pull requests, code reviews.

Machine Learning Intern

Feb 2024 – Apr 2024

Incture | India

- Built Python data pipelines with Pandas and NumPy to process large datasets.
- Built and tested machine learning models to automate business workflows.
- Worked with cross-functional teams to turn data insights into business decisions.

KEY PROJECTS

GateFlow — coergateflow.cloud

Python, Django, PostgreSQL, React.js, Hostinger VPS

- Built a hostel management platform used at COER University and Quantum University for room allocation, outpass management, and fee tracking.
- Cut student wait times for outpass and gate processes by about 80% with a self-service digital workflow and real-time entry/exit tracking.
- Designed a normalized PostgreSQL schema and role-based access control for wardens, admins, guards, and students.
- Fixed security issues in guard and admin views after launch and keep patching as needed.

Smart Reporting System

React.js, Node.js, Cyborg ERP Integration | Team of 3

- Built a digital reporting and onboarding system for COER University's annual student reporting process, serving over 7,000 incoming students across 23 counters.
- Built live dashboards for staff to track counter status, plus a self-service dashboard for students to verify documents, submit forms, and capture ABC IDs.
- Integrated the system with COER's existing Cyborg ERP, hosted on the university's own server.
- Shared ownership of dashboard development, ERP integration, and workflow logic across a 3-person team.

RasoiFlow — rasoiflow.cloud

Python, PostgreSQL, React.js, Hostinger VPS

- Built a restaurant POS and management platform used by multiple restaurants for orders, billing, and inventory.
- Built analytics dashboards and role-based staff management, with APIs optimized for real-time operations.

PaperFlow.ai — paperflowai.in

Python, Flask, OpenAI API, PostgreSQL

- Built an AI-powered platform that generates exam papers in bulk from uploaded question banks.
- Used an LLM to categorize questions and automate paper generation.
- Deployed at COER University, supporting bulk downloads with customizable difficulty levels.

E-Commerce Platforms — Sterling Kart & Aghorify — sterlingkart.in | aghorify.in

React.js, Node.js, Express, PHP, PostgreSQL, MySQL, Redis, Razorpay, Shiprocket

- Built and led architecture for two production e-commerce platforms — Sterling Kart, a sterling silver jewellery store, and Aghorify, a multi-category store for jewellery, beauty, baby care, and school essentials.
- Designed data models for orders, coupons, loyalty, and gift cards on Sterling Kart, and built the full React frontend plus PHP backend APIs for Aghorify.
- Integrated Razorpay for payments on both platforms, along with Shiprocket for automated shipping and WhatsApp for order updates and customer support on Aghorify.
- Used Redis to cache live silver pricing on Sterling Kart for real-time price lookups.
- Ran a full security and performance review before launch, fixing gaps in payment validation, rate limiting, and input validation.
- Aghorify is live in production, serving about 500 daily active users and handling real customer orders, payments, and shipping.

Job Market Intelligence Platform — Live Dashboard

Python, Pandas, BeautifulSoup, Streamlit, SQLite

- Built a job market analytics platform that scrapes job postings across India.
- Built a 5-tab Streamlit dashboard showing hiring trends, salary patterns, and skill demand.
- Built a SQLite backend with a weekly auto-refresh pipeline for top skills and salary ranges by experience level.

EDUCATION

College of Engineering Roorkee (COER), Uttarakhand, India

2022 – 2026

B.Tech in Computer Science & Engineering | CGPA: 7.8/10

CERTIFICATIONS & ACHIEVEMENTS

- Machine Learning Specialization — Coursera (Andrew Ng)
- Full Stack Web Development — Udemy
- 3rd Position — Manthan, COER University Hackathon
- 3rd Position — Cognizant Hackathon 2024, IIT Roorkee
- Secured ₹8,00,000+ in sponsorships while leading the Sponsorship Team at COER University

LEADERSHIP & EXTRACURRICULAR

- Led Sponsorship and Technical Coordination initiatives for university-level events and hackathons
